FIS, Workforce Analyst II

Nov 2021 – Jul 2024

- Implemented BI solutions in alignment with stakeholder goals, uncovering bonus overspend, overtime pay, and I&D KPIs; boosted data accuracy by 70% and minimized manual reporting workload.
- Led end-to-end ETL pipeline development and BI dashboard deployment with Power Platforms and SQL; recognized with the 2023 People Excellence Award for outstanding contributions.

Infogain, Software Engineer

Apr 2021 – Oct 2021

- Delivered scalable BI and data integration solutions through diverse collaboration, utilizing SQL, Azure optimization, and data integration across platforms to strengthen sales forecasting and cut logistics costs by 30%.

Dynamic Corporate Solutions, Business Intelligence Developer

Dec 2081 – Jan 2021

- Designed and deployed data models and ETL pipelines in SQL and Azure to consolidate structured datasets, eliminating inconsistencies and improving reporting accuracy.
 - Built real-time BI dashboards that increased transparency into property sales, enabling a 25% growth in sales and improved client retention.
-

Academic Projects

AI- Powered Library Seat Finder System

Mar 2025 – May 2025

- Developed a real-time occupancy detection application using computer vision in Python to optimize space utilization, enhance user experience, and support smart infrastructure management.
- Tools: AWS SageMaker, Python, Computer Vision

Prediction of Culinary Food Trend

Jan 2025 – Mar 2025

- Orchestrated time series forecasting, sentiment analysis and topic modelling over time to identify trending food items, cuisines, and customer preferences.
- Tools: Python, Yelp Dataset

ChatGPT Positioning Strategy

Jan 2025 – Mar 2025

- Conducted positioning strategy through user data segmentation analysis, evaluating competitors and providing recommendations for customer engagement.
 - Tools: Python, Enginius
-

Volunteering & Leadership

- Research Work: Developed and deployed a Python-based web scraper using the Apify platform to analyze Yelp reviews, extracting and validating data on restaurants with robotic technology for an LLM label validation task
- IEEE'16 Pictorial Event Organizer: Led a 10-member team and oversaw ideation, content creation and final publication.
